General Description

Profico, founded in 1991, has since focused its activities on Design and Construction Coordination and Supervision. Profico is an independently owned company. The main objectives of Profico include the search for rationalization, respect for deadlines and flexibility to adapt the services provided to the needs of clients, respecting safety, legislation and quality requirements. Profico has worked in close cooperation with different companies specialized in areas outside the scope of Profico, including topography, geotechnics, electrical and mechanical infrastructures and architecture, allowing Profico to assume the coordination of multidisciplinary projects, through its Project Management Division. Through its affiliated Profico Environment and Territorial Planning, founded in 2000, the company provides a manifold of services in the vast field of environmental studies. The enterprise is nowadays in Angola, Mozambique and Brazil through its affiliates, CENGA, ECM and PROFICO BRAZIL.
